Title: PROCESS FOR MANUFACTURING  
INTRAOCULAR LENSESWITH BLUE LIGHT  
ABSORPTIONCHARCATERISTICS

Attorney Docket No. P03306

Commissioner for Patents

P.O. Box 1450

Alexandria, VA 22313-1450

**RESPONSE TO RESTRICTION REQUIREMENT**

Sir:

In response to the Office action dated November 30, 2005, the Applicants hereby elect the following species:

Reactive yellow dyes (Species A) of the group of blue light absorption moieties;

Materials having ethylenically unsaturated groups (Species A) of the group of suitable materials;

Substituted ultraviolet photo initiators, conjugated ketones, triazine-yl, and metal salts (Species A) of the group of photo initiators; and

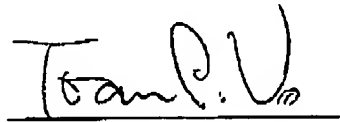

Serial No. 10/657,356

Visible light source (Species A) of the group of visible light.

Claims 1-8, 10-14, 16, and 18-22 read on these elected species.

It should be noted that claims directed to acrylate or methacrylate material are included in the above-identified group of claims because acrylate and methacrylate materials are material having ethylenically unsaturated groups.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Toan P. Vo", is written over a horizontal line.
